Under Worcester's Sunny Sky

THE MEMBERS OF THE CONGRESS ARE LEARNING about the many educational institutes run by the Assumptionists and the Oblates of the Assumption around the world.

The famous trilogy: "*Look - Judge - Act...*" is well known from the Catholic Action movement. This is the method, at once flexible and modern, that is guiding the work of the International Education Congress. On the second day we LOOKED at 25 institutes in Africa, North and South America and Europe. The participants were introduced to a series of primary, secondary and College level schools. The point was to discover the common characteristics that distinguish these schools. How are they similar and how are they different? What are the characteristics that identify them as typically Assumptionist?

The rain that fell on the Assumption campus this afternoon is certainly a sign of God's blessing on this day's work. Our Spanish speaking brothers led us in the celebration of the Eucharist this morning. Tomorrow is another day....
