

"Everything is unstable ... outages of electricity, water, Internet, and telephone. A good part of the country is in ruins.

We are doing well. We were able to celebrate Masses outside in the grotto today. We couldn't open the basilica to pilgrims. There were very few visitors here today since there is very little public transportation running. The subway line closest to the shrine has been closed for safety reasons.

Thanks for all the prayers.

We are worried that we have no news from Lota. Unconfirmed reports have arrived indicating that our school has collapsed."
